

## EDUCATION

### **Cornell University**

PhD in Applied Economics and Management (AEM)

May 2027

### **University of Arizona**

Master of Science in Applied Economics and Policy Analysis (AEPA)

May 2021

### **Colby College**

Bachelor of Arts, Economics (major) and Mathematics (minor)

May 2019

## SELECTED PROJECTS

### **Regulator Enforcement and Firm Compliance: Drinking Water Utility Compliance with Water Contamination Regulation**

Identified the response of drinking water utilities and regulators to increases in water contamination from coal mining. Firms under-report water quality to avoid rising costs of self reporting. Regulator sanitary visits substitute firm self-reporting, shifting costs from firms onto regulators. Regulators could reduce under-reporting by raising penalties for under-reporting when contamination rises. Developed a quasi-experimental instrumental variable to enable causal claims. Policy **insights transferable to pricing and designing general regulatory compliance.**

### **Regulation Impact Assessment and Health Damage Analysis: Outdoor Worker Heat Protection Laws**

Developed a quasi-experimental study of the health costs of heat using the repeal of Texan outdoor worker heat protection laws. Used state run workers' compensation data from the Texas Department of Insurance to calculate health damages. **Results credibly quantify the cost of extreme heat to worker health, productivity, and public finances. Techniques applicable to calculating costs to public or private insurance.**

### **Consumer Demand Modeling: Impact of Water Pollution on Recreation and Housing Demand**

Estimated national willingness to pay (WTP) for reducing water pollution. Modeled WTP with a combination of house price hedonic models and discrete choice recreation demand models using national data of home sale prices, cellphone mobility, and satellite derived and in situ water quality. Demand modeling **techniques can be used to estimate welfare gains and losses from product characteristics or defects.**

## PROFESSIONAL EXPERIENCE

### **Cornell University**

*Graduate Resident Fellow, Carl Becker House*

Ithaca, New York

August 2023 – Present

- 400 students required residential community support services in university housing.
- Tasked to mentor residents, create community safety, and produce extracurricular events to meet resident demand.
- Trained staff in student crisis response and organized networking and extracurricular activities.
- 25% annual increase in resident attendance at events and 10% reduction in student mental health calls.

### **Cornell University**

*Lead Graduate Teaching Assistant: Applied Economics and Management*

Ithaca, New York

August 2022 – Present

- Managed five undergraduate TA's for a 200 student intermediate microeconomics class.
- Tasked with maintaining student grades throughout the semester and supporting the instructor.
- Coordinated TA office hours to focus on topics that students struggled with in assignments and exams.
- Maintained a class average grade of A-.

### **World Bank Group (WBG)**

*Consultant, International Development Association*

Washington, DC

May 2020 – August 2020

- Living Standards Measurement Study - Integrated Surveys on Agriculture (LSMS-ISA) required data cleaning to construct a reliable variable for crop yields.
- Tasked with creating a procedure for other researchers to clean and analyze the data.
- Wrote a guide document with reproducible code, guiding researchers from downloading data to producing summary tables.
- The guide was adopted as a training reference.

### **University of Arizona**

*Graduate Research Assistant for Jeffrey Michler and Anna Josephson, Assistant Professors*

Tucson, Arizona

August, 2019 – July, 2021

- Co-authored paper on market completeness in the rice market in the Philippines.

- Prepared agricultural production data from the WBG’s LSMS-ISA.

## Colby College

*Research Assistant for Daniel Lafave, Assistant Professor*

Waterville, Maine

June, 2017 – May, 2018

- Processed results of an RCT to reduce deforestation with improved cookstoves in rural Ethiopia.
- Co-authored an economic letter titled, ‘Preferences and (Mis)Perceptions of Inequality in China.’

## International Crops Research Institute for the Semi-Arid Tropics (ICRISAT)

*Research Assistant for Jeffrey Michler, Postdoctoral Research Fellow*

Bulawayo, Zimbabwe

June, 2016 – July, 2016

- Digitized hard-copy field surveys collected for a clean cookstove adoption trial that took place in Zambia.

## TECHNICAL SKILLS

**Languages & Tools:** Python (advanced), R (advanced), Stata (proficient), SQL (proficient), SAS (proficient), MATLAB (proficient)

**Quantitative Methods:** Time series econometrics, regression analysis, ML, demand modeling, hedonics, spatial modeling

**Causal Inference:** Difference-in-differences, instrumental variables, regression discontinuity, RCTs

## TA CLASSES

AEM 2600 Managerial Economics, AEM 4190 Strategic Thinking, AEM 3205 Ethics in Business and Organizations, AEM 4421/AEM 5421 Research and Strategy in Emerging Markets, ECON 1120 Introduction to Macroeconomics

## AWARDS AND PRIZES

**Agricultural and Applied Economics Association** *Outstanding Master’s Thesis Award*

May, 2022

- Won the AAEA Outstanding Master’s Thesis Award for my thesis, *Labor, Credit, and Markets: Evidence from the Philippines, 1970-2016*.
- The paper studies if small scale rice farmers in the Philippines have access to complete markets.

## VOLUNTEER EXPERIENCE

**Graduate Student Association: Applied Economics and Management**

Ithaca, New York

*Co-vice president*

May, 2022 – June, 2023

- Assisted in designing, planning and running academic and non-academic programming for AEM graduate students.
- Organized the graduate student presentation seminar.

## GRANTS

**Davis Grant for independent research, Colby College**

Jan, 2018, and Jan 2019

- Awarded to conduct Urban Economic History Research for my senior thesis, “The Persistent Effects of Segregation on Residential Water Use in Bulawayo.”
- Total Davis grant awards: \$8000
