

EXECUTIVE SUMMARY

PhD Applied Microeconomist with expertise in causal inference, market/non-market product valuation, and big data analysis. Proven researcher able to combine big public and proprietary data with theory to derive insights into firm, regulator, and consumer behavior. Seeking roles in consulting, economic strategy, and tech where data analysis generates strategic insights.

SELECTED PROJECTS

Regulatory Compliance: Drinking Water Utility Self Reporting and Coal Mining Contamination

Developed a quasi-experimental study on changes in drinking water utility compliance with required self reporting after coal mining water contamination. Policy **insights transferable to pricing and designing general regulatory compliance.**

Regulatory Impact Analysis: Heat Protection Laws, Worker Health, and Productivity

Developed a quasi-experimental study from the repeal of Texan worker heat protection laws to identify the health risks of heat using workers compensation data. Results **demonstrated the cost of extreme heat to worker productivity and state finances, as well as techniques applicable to extreme weather risk mitigation.**

Consumer Demand Modeling: Impact of Water Pollution on Recreation and Housing Demand

Estimated national demand for outdoor recreation using cellphone mobility and geospatial data. Demand modeling **techniques can be used to estimate consumer and market demand for any product and any product characteristic.**

PROFESSIONAL EXPERIENCE

Cornell University

Graduate Resident Fellow, Carl Becker House

Ithaca, New York

August 2023 – Present

Led academic and extracurricular programs with a team of 12 staff for over 380 undergraduate student residents.

Co-led and trained crisis response teams to address student residential crises, including wellness checks, interstudent conflicts, interventions for suicide and self harm, and medical emergencies.

Cornell University

Lead Graduate Teaching Assistant: Applied Economics and Management

Ithaca, New York

August 2022 – Present

Taught topics in game theory, microeconomics, business consulting, and statistics. Lead a team of six teaching assistants to coordinate teaching, grading, and training. Reduced lead professor teaching and grading workload by leading, organizing, and delegating among supervisees.

World Bank Group

Consultant, International Development Association

Washington, DC

May 2020 – August 2020

Designed and authored a guide to analyzing World Bank group survey data. Produced reproducible coding and analysis for disseminating to practitioners and researchers. Guide adopted as training reference.

TECHNICAL SKILLS

Languages & Tools: Agentic AI (advanced), Python (advanced), R (advanced), Stata (proficient), SQL, SAS, MATLAB

Quantitative Methods: Time series econometrics, regression analysis, ML, demand modeling, hedonics, spatial modeling

Causal Inference: Difference-in-differences, instrumental variables, regression discontinuity, RCTs

EDUCATION

Cornell University

PhD in Applied Economics and Management (AEM)

Ithaca, NY

August 2021 - May 2027

University of Arizona

Master of Science in Applied Economics and Policy Analysis (AEPA)

Tucson, AZ

May 2021

Colby College

Bachelor of Arts, Economics (major) and Mathematics (minor)

Waterville, ME

May 2019
